Back-end Development Node.js, PHP/Laravel, Express.js

DevOps, Version Control & Databases Git, MySQL, PostgreSQL

Career Experience

Junior Developer Intern | Njomi Tech Solutions, Douala, Cameroon (Remote) **08/2025 – 02/2026**

- Contributed to the development of **EducLynk**, a home tutor-finding platform, by resolving bugs and implementing new features across the multiple React.js frontend and Laravel/PHP API repositories.
- Opened and merged 18+ pull requests across both codebases, covering UI enhancements, bug fixes, backend logic, and new feature development.
- Delivered a Multi-select Date Picker for content filters and real-time profile update functionality with enhanced question pagination. As well as chapter filtering logic on the frontend and adjusted the Laravel ChapterController to handle corresponding filter requests on the backend.
- Developed and deployed several new client-facing web pages, including **FAQ** and **Referral pages**, significantly improving website functionality and user experience.
- Implemented real-time user statistics updates on question answers and a User Residence Filter for admin use on the backend.
- Built and shipped a Leaderboard component ranking students by correctly answered questions, driving engagement on the platform. Built and shipped a Leaderboard component ranking students by correctly answered questions, driving engagement on the platform.
- Collaborated** with the Head of Development to design and build interactive learning components for the new Learning Hub platform, allowing students to watch course content, answer questions, and receive real-time feedback.

Software Developer Intern • V-Groups, Yaounde, Cameroon

06/2025 – 8/2025

- Fulfilled tasks presented by the supervisor, attended meetings, and performed research as per supervisor's request.
- Developed and deployed** a scalable [e-commerce platform](#), handling both front-end and back-end development.
- Utilized** a modern tech stack including Vue.js for the front end, Node.js and Express for the back end, and PostgreSQL for the database.
- Hosted** the full-stack application on Render, and integrated cloud services like Neon for database hosting and Supabase for product image storage.

Full Stack Development Intern • Landmark Software Solutions, Buea, Cameroon
07/2024 – 08/2024

Completed a 2 month internship within the Full Stack Development hub.

- Played a crucial role in the company's IT initiatives, contributing to the planning, development, and deployment of computerized solutions.
- Involved in strategic planning, hands-on development, and successful deployment of IT projects.
